Annexure 1: Pakistan Priority Framework & Baseline Data Details

Annexure 2: Results of Local Indicators (questions) for Citizens' Scorecard on Selected Targets

of Goal 16+

Annexure 3: References for table data in Chapter V

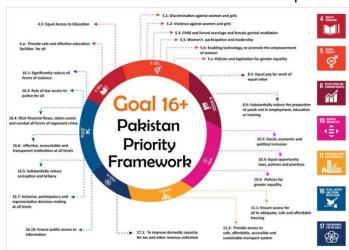

#### Chapter I: SDGs and Goal 16+ in the Context of Pakistan

Goal 16 + is considered as catalyst for sustainable development and empowerment of citizens. It comprises of 8 goals out of 17 SDGs. Apart from goal 16, goal1, 4, 5, 8, 10, 11 and 17 are part of Goal 16 + integrated framework for the realization of 2030 Agenda for sustainable development. Other than 12 targets of goal 16, 24 targets of 7 SDGs (mentioned earlier) are part of Goal 16+, therefore all together these 36 targets and their aligned 53 indicators will be directly measuring the progress on various aspects of peace, inclusion and access to justice etc.

In the context of Pakistan goal 16+ is not in governmental debate at all, however it can fairly be defined while examining the national priority framework of SDGs<sup>1</sup>. National priority framework divides 17 SDGs in to three priority categories and also selects some priority targets and indicators against each goal as mentioned in the picture (a). Goal 4 (quality education), goal 8(decent work & economic growth) goal 16( peace, justice & strong institutions) and goal 17(partnerships for the goals) are placed in the category-I, that requires immediate policy intervention as desirable outcomes can be achieved in the short term. However time span for

the short term is not defined in the national priority framework. Goal 1(no poverty), goal 5 (gender equality), goal 10 (reduced inequalities), goal 11(sustainable cities and communities) are placed under category-II, that requires relatively longer timeframes and consistent policy support. Whereas no goal 16+ SDG is placed under category-III, that requires even longer gestation period and major institutional reforms to achieve desired outcomes.

Out of total 36 global targets under Goal 16+, Pakistan has chosen only 23 targets as national priority targets. Resultantly out of 53 global indicators of goal 16+, Pakistan has chosen only 32

<sup>1</sup> http://pc.gov.pk/uploads/report/National SDGs Framework - NEC 2018.pdf

indicators as national priority. Interestingly the baseline data is available against 13 indicators only as mentioned in the national priority framework diagram above. Further detail of goal 16+ related national priority targets, indicators and availability of baseline data is shared in the Annexure -1

## **Historical Connection & Failures on Sustainable Agenda:**

Pakistan lagged far behind in achieving Millennium Development Goals (MDGs) due to war against terrorism since the year 2000, devastating earthquake in 2005, and countrywide floods in the year 2010, 2012 and 2014. This was estimated that only in ten years war against terrorism Pakistan's economy lost USD 100 billion. Moreover, Pakistan lost lives of more than 70000 innocent people in war against terrorism. The efforts of Pakistan on war against terrorism were never recognized by international community due to geo-political positioning and various other internal reasons including state sponsored militarization. Resultantly Pakistan were placed in to the gray list of Financial Action Task Force (FATF) in 2008. Since then, Pakistan has been struggling to be whitelisted until date. While remained in gray list of FATF for the last 13 years Pakistan has lost more than USD 38 billion. The Parliament of Pakistan devised the National Action Plan (NAP) in 2014<sup>2</sup> to combat terrorism as well as to counter violent extremism. The NAP-2014 was comprised of 20 targets (as mentioned in the picture) and almost all of them were in fact contributory towards the achievement of today's goal 16 + targets and indicators however the progress on some of the targets remained very slow, including ban on the glorification of terrorism and terrorist organizations through print and electronic media, taking effective measures against religious persecutions and choking financing for terrorism and terrorist organizations etc. The new government has taken many positive steps to fulfill the requirements of FATF and out 27 requirements of various nature, 24 have already been fulfilled and significant progress was recognized by FATF in its most recent online session during February 2021<sup>3</sup>. Rest of the three requirements are related to terror financing for which Pakistan has already taken many positive measures including legislation against terror financing.

<sup>&</sup>lt;sup>2</sup> https://nacta.gov.pk/nap-2014/

<sup>&</sup>lt;sup>3</sup> https://www.dawn.com/news/1609329

therefore there is a great hope that Pakistan would be able to get out of gray list in the coming session of FATF in June 2021.

ne 20 agenda items of National Action Plan 2014 are

## Pakistan's First VNR and Goal 16+

Pakistan has presented its first voluntary national review (VNR) report in July 2019<sup>4</sup> however no separate chapter was available on goal 16+ progress whereas reflections on goal 1, goal 5, goal 8 and goal 17 were given only by highlighting processes towards their implementation. Interestingly process and /or progress on any of the goal 16 targets or indicators, was also not even reflected in Pakistan's first official VNR 2019.

Moreover, the report shares the signed declaration by elected local government representatives at the front that shows the importance of local governments in the localization and implementation of SDGs. The declaration also signifies the repeated demand local government representatives for more political including administrative and financial empowerment. However this is imperative to mention here that

most of the local government officials, who signed this declaration were not having current / recent mandates as most of the local bodies / governments are non-functional since 2010.

## Chapter II

Please Refer to the Regional Report

## Chapter III: SDGs & Data gaps

National data is very important in order to measure the progress of SDGs particularly goals, targets and indicators prioritized in the national framework as mentioned above. According to the national priority framework only 69 targets and 96 indicators have been chosen at the first place for the implementation of SDGs while categorizing them in three tiers i.e. short term, medium term and long term. Baseline data is available against 50 out of 96 indicators. On the other hand only 23 targets and 36 indicators are prioritized in the national framework whereas data is available against 13 indicators only.

Pakistan Bureau of Statistics (PSB)<sup>5</sup> is the major source of official data collection and data analysis for various policy institutions. Furthermore there are 25 other sources of data provision including Pakistan Demographic Health Survey (PDHS)<sup>6</sup>, Pakistan Social & Living Measurement (PSLM)<sup>7</sup>, Multiple Indicators Cluster Survey (MICS)<sup>8</sup>, Labour Force Survey<sup>9</sup> (LFS), Population Census<sup>10</sup>, Agriculture Census<sup>11</sup>, and Household Integrated Economic Survey (HIES)<sup>12</sup>. Government also collects data through scorecard to measure poverty to provide cash grants to 120 million people under Ehsaas Program. Some of these survey are being conducted every year and some are carried out on multiyear basis. Population census is carried out every ten years and HIES is carried out every year before the announcement of yearly budget. As far as the data availability regarding the measurement of SDGs progress and reporting, Pakistan has carried out the data gap assessment and published Data Reporting Gaps 2018.<sup>13</sup>

<sup>12</sup> https://www.pbs.gov.pk/content/household-integrated-economic-survey-hies-2018-19

<sup>13</sup> https://www.sdgpakistan.pk/uploads/pub/Data Reporting Gaps 2018.pdf

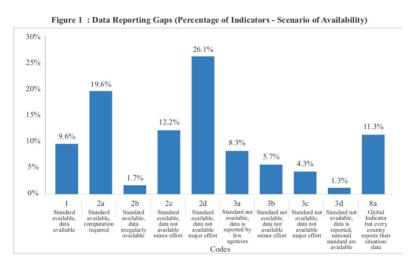

The report shares complete state and dynamics of data availability against each goal including targets and indicators.

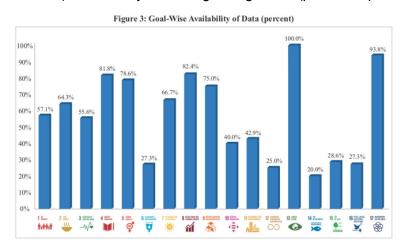

Figure1 shows that complete data is currently available against 9.6% of total 244 indicators whereas standard definition is available for data against 19.6% of the total indicators. Only computation is required to make sure the availability of more data. Minor efforts are required to get data against 12.2% of indicators whereas major efforts are

required to get data against 26.1% of the indicators. Pakistan has been considering 11.3% of the total 244 indicators as global indicators therefore it may depend upon availability of situational data.

Figure 3; shows the availability of data against each goal. 100% data is claimed to be available against goal 13 (climate action) followed by 93.8% against goal 17 (partnerships

for the goals). Pakistan has already acclaimed achievement of goal 13<sup>14</sup>, however civil society organizations have rejected this claim. On the other hand only 20% data is available against goal 14(life below water) in spite of the fact that Pakistan has more than 1000 KMs of Arabian seashores having immense opportunities for Pakistan to explore and build on blue economy.

<sup>14</sup> https://www.pk.undp.org/content/pakistan/en/home/presscenter/pressreleases/2020/the-ministry-ofclimate-change-and-undp-celebrate-pakistans-achi.html

Figure 3, also shows that majority of the 8 goals which come under goal 16+ have more than 50% availability of data including 57.1% against goal 1, 81.8% against goal 4, 78.6% against goal 5, 82.4% against goal 8, 40% against goal 10, 42.9% against goal 11, 27.3% against goal 16 and 93.8% against goal 17.

Moreover, Table 1, also shares the indicator wise summary of the data availability against each

goal. 100% data is available against only 22 indicators whereas standards are available and computation is required to get the complete data from existing sources against 45 indicators. Minor efforts are required to be done to get data against 32 indicators and major efforts are required to be done for data against 133 indicators. 40 indicators are considered to be related with global targets that will not be implemented at national level. As far as goal 16+ indicators are concerned data is readily available against 13 indicators only.

This is important to mention that government of Pakistan has also constituted a national coordination committee comprised of 22 ministries/ federal government institutions for regular provision and review of data against each indicator of SDGs.

Interestingly Ministry of Climate Change will be held responsible against data collection on 50 indicators

followed by Ministry of National Health Services, Regulations & Coordination (36 indicators), Ministry of Finance (31indicators), Ministry of Planning Development & Reforms (20 indicators) and Ministry of Food Security (14 indicators) etc. This is interesting to mention here that Ministry of Human Rights will be collecting data on only 8 indicators related to goal 5, 10 and 16 whereas Ministry of Interior will be collecting data on 10 indicators of goal 16. This means that this data will remain kept as secret and CSOs will have no / limited access to this data.

## Chapter IV: Role of Various Stakeholders to Monitor Progress on Goal 16+

Parliaments, CSOs, Judicial forums, media and academic institutions have important role to play in the proper and regular implementation of goal 16+ targets and indicators. However, they may be able to commence their role if their role is recognized and if they are engaged and heard appropriately. The following are the salient features regarding their roles and capacities.

- There are more than 153 members of 7 Parliamentary Task Forces at national and provincial levels. The role of Task Force members is to oversight the implementation of SDGs. However most of the members of task forces are unaware about the SDGs. These members also sit in the various standing committees of the Parliament including standing committee on gender mainstreaming, education, law & justice, local government, women economic empowerment etc. However their information on SDGs is zero or extremely insufficient therefore they lack capacity to participate meaningfully in such meetings and hold the executives accountable. The Standing Committees of the House plays an important role in oversight & monitoring the working of the relevant Ministries of the Govt. In the parliamentary democracies, the Committees are regarded as 'eyes, ears, hands and even brain of the Parliament. There is a great capacity deficit in Parliamentarians that requires huge investments
- Very recently the Auditor General of Pakistan submitted the audit report on SDGs<sup>15</sup> at the Public Accounts Committee. The report shares embezzlements in 24 billion rupees fund allocated for the implementation of SDGs in September 2017. None of the Parliamentarians neither from treasury nor from the opposition raised any query on this mismanagement because they do not understand the nature of utilization of these funds. Most of the Parliamentarians do not given any interest in SDGs because they consider SDGs as foreign agenda.
- Budgetary indicators demonstrate a glaring lack of consideration when it comes to SDGs in Pakistan. An analysis of budgetary allocations conducted by UNICEF indicates that the total allocation for Human Development programs has remained around 0.74% of the total public expenditure of the Federal government in 2013-14 and less than 1% of GDP during the last four years. This makes it imperative for programs, interventions, and policies to champion the

<sup>&</sup>lt;sup>15</sup> https://tribune.com.pk/story/2260952/auditors-point-<u>out-deficiencies-in-sdg-schemes</u>

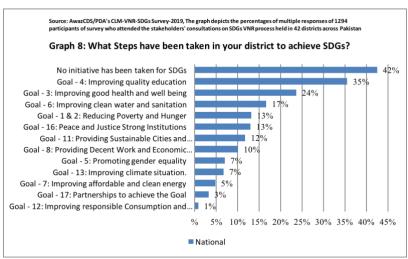

rights of the people effectively. Since investment in public is demonstrated through the state budget- the budget should be Human-friendly/sensitive. It is a first step in examining the resources government is allocating to programs that benefit the general public, and whether these programs adequately reflect the needs of the citizens.

- Pakistan Development Alliance carried out country wide assessment on SDGs implementation and published stakeholders report on SDGs progress and challenges in Pakistan<sup>16</sup>
- Pakistan Development Alliance also conducted countrywide assessment to collect citizen voices on progress of SDGs. Planning Commission of Pakistan which is the apex body for progress and reporting on SDGs in the country assigned this task to Pakistan Development Alliance apropos to the Voluntary National Review reporting in 2019. The citizens voices were collected from 42 districts representing all the provinces and regions of Pakistan. The report shares the reflections of more than 1294 people engaged in the process to understand their thoughts on steps taken for the implementation of SDGs in their districts as

well as the challenges they are facing. According to the Citizens' Voices Report 2019<sup>17</sup>, 42% of the respondents say that no initiative has yet been taken in their respective districts regarding SDGs. 35% recognize an improvement in education (goal4) and 24% admit

improvements in health and well being (gaol3). However as far as goal 16+ are concerned only 13% are happy with government initiatives on poverty eradication (1.b), 7% on gender equality (5.1, 5.2, 5.3, 5.4, 5.5, 5.c), 10% on providing decent work and opportunities for economic growth (8.5, 8.7, 8.8), 12% on inclusive urbanization, safe public spaces and work places (11.1, 11.2, 11.3, 11.7), 13% on peace justice and strong institutions (16.1, 16.2, 16.3, 16.4, 16.5, 16.6, 16.7, 16.9 and 16.b), whereas only 3% recognized the efforts of governments for improving partnerships to achieve SDGs. None of the respondents recognized any progress on reducing inequalities (goal 10).

<sup>&</sup>lt;sup>16</sup> http://sdg.iisd.org/news/stakeholders-report-on-sdg-progress-and-challenges-in-pakistan/

<sup>&</sup>lt;sup>17</sup> https://gcap.global/wp-content/uploads/2020/06/Pakistan-Citizens-Voices-Report-2019.pdf

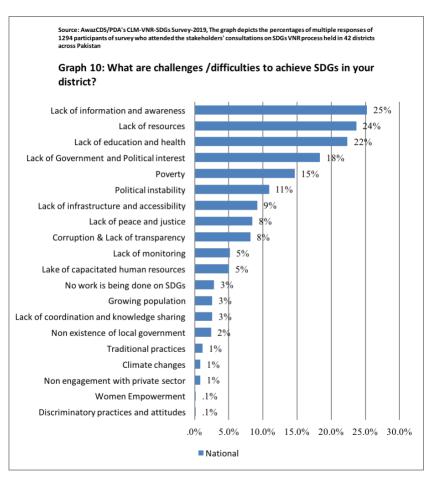

below table share The multiple and chronic challenges for achieving SDGs at district levels as described bv On respondents. average 25% respondents consider lack information awareness as one of the major challenge to achieve SDGs. Whereas. 24% stakeholders said that lack of resources followed by 22% who consider lack education and health as major challenges towards the achievement of SDGs Pakistan. 18% of the stakeholders were of the view that lack of political interest is impediment major achieving SDGs in Pakistan. Interestingly, only 15% of the respondents think that poverty is one of the challenge in achieving SDGs

followed by 11% who think political instability as a major challenge for achieving SDGs in Pakistan. Less than 10% said that lack of infrastructure & accessibility, rampant corruption and lack of transparency, poor peace and lack of justice, political influences and lack of monitoring are some other challenges to achieve SDGs at district level. More over less than 5% respondents said that lack of skilled and technical human resources, lack of coordination and knowledge sharing, growing population, non-existence and malfunctioning of local governments, climate changes, traditional and customary practices and non-engagement with private sector as some other challenges in achieving SDGs in Pakistan.

## **Chapter V: SDGs 16 + & Fundamental Freedoms:**

Pakistan is signatory of almost all major global commitments including CEDAW, CRPD, CRC, ICCPR etc. and has very recently adopted agenda 2030 for social transformation in September 2015. Pakistan has already presented its VNR report on SDGs during HLPF2019 and had committed for second VNR report in the forthcoming HLPF 2021 however the decision was taken back in January 2021. Pakistan has presented last UPR in 2017 however it progress on follow up of recommendations is very slow.

According to the UNDP's Human Development Index 2020 Pakistan is ranked 154th where 40% population lives below poverty line (@ USD1 per day), 22.80 million children are out of schools. Pakistan is among two countries of the world which are not polio free yet including Nigeria. Local government system is non-functional therefore the citizens' participation is very low and Pakistan is rated Partly Free in the recent Global Freedom House Report 2020<sup>18</sup> whereas it is INACTIVE member of the Open Government Partnership<sup>19</sup> due to non-compliance. Pakistan is also placed in the grey list of Financial Action Task Force (FATF) for the last thirteen years. Civic spaces are shrinking and CIVICUS Monitor<sup>20</sup> has ranked Pakistan in REPRESSED countries whereas Civil Society Index 201921 ranked Pakistan in **EVOLVING** category. Freedom of expression and speech, right to information are constitutional rights under Article 19 and 19A respectively but laws and policies of state authorities related to these constitutional rights are derogatory.

<sup>&</sup>lt;sup>18</sup> https://freedomhouse.org/country/pakistan/freedom-world/2020

<sup>&</sup>lt;sup>19</sup> https://www.opengovpartnership.org/members/pakistan/

<sup>&</sup>lt;sup>20</sup> https://monitor.civicus.org/country/pakistan/

<sup>21</sup> https://www.fhi360.org/sites/default/files/media/documents/resource-csosi-2018-report-asia.pdf

The table<sup>22</sup> attached shows the five years related situation human development, educational, employment, economic, democratic and civic rights. Since the adoption of SDGs governments various have frequently made tall claims towards the implementation global and national commitments regarding listed indicators. If we analyze the situation considering the goal

S. no	Indicators	2016	2017	2018	2019	2020
1.	Human Development Index	145	147	150	152	154
2.	Poverty rate	24.3%	28.4%	31.3%	40%	40%
3.	Enrolment Rate	60%	64%	67%	82%	Couldn't find
4.	Gender parity index	143	112	148	152	151
5.	Employment Rate	5.8%	5.7%	5.50%	4.1%	4%
6.	Economic equality (Gini Coefficient / year )	32.1	37.60	36.20	No latest data found	No latest data found
7.	Democracy Rank	100	104	108	112	108/167
8.	Civic space Rank	Repressed	Repressed	Repressed	Repressed	Repressed
9.	Transparency Rank	116	117	124	120	124/180
10.	Rank of Judiciary	NA	NA	98	117	120

16+ targets and indicators, we see there is 15.7% rise in poverty so efforts towards the achievement of poverty eradication (1.b) need to be enhanced. Although the enrolment rate has been increased from 60% in 2016 to 82% in 2019 yet more than 50% of the enrolled students leave schools before completing their primary level grades. There is a huge gap in the education facilities for both genders therefore the equal access for education for all (4.5), education facilities (4.a), quality education for peaceful global citizenship (4.7) is still a dream. Gender inequalities are continuously rising as the situation of gender equality (5.c) was better in 2016 & 2017 than in 2020 as the gender parity index rated Pakistan at 143 in 2016 and 151 in 2020 out of 153 countries. Employment rate has gone down from 508% in 2016 to 4% in 2020 and this may be due to the effects of COVID-19 on our economy. As per Gini Index<sup>23</sup> the income inequality has also increased 4.1 points i.e. 32.1 in 2016 and 36.2 in 2018. Therefore the country's policies for greater equality (10.4) and opportunities for inclusive social and political participation (10.2) are failing and not fruitful.

Pakistan is placed under controlled and hybrid regimes in the global democracy index.. Pakistan was better in democratic governance (16.8) and inclusive and participatory decision making (16.7) in 2016 as it was ranked as 100 and it went down at 112 in 2019 and gone up a bit at 108 in 2020.

<sup>&</sup>lt;sup>22</sup> References of the figures in the table are attached as Annexure

<sup>&</sup>lt;sup>23</sup> https://en.wikipedia.org/wiki/Gini coefficient

Civic spaces have been extremely repressed since 2016 till date due to new derogatory regulatory policy environment towards civil societies, political participations and human rights voices. Unless a better policy environment for effective, accountable and transparent institutions at all levels (16.6) are not introduced, civic spaces will remain limited in Pakistan. Illicit financial flows, organized crimes (16.4), corruption and bribery (16.5) have gone much beyond control as every year the Corruption Perception Index of Transparency International reports us deteriorating figures and shares 8 points increase in corruption and bribery i.e. 116 in 2016 and 124 in 2020. When it comes to rule of law & access to justice (16.3), the role of judiciary is pivotal however the lower upper judiciary is non performing and highly political. The recent report of World Law & Justice Project<sup>24</sup> share the rule of law index and ranked Pakistan's judiciary at 120 that shows the dismalling status of rule of law and access to justice for all.

Pakistan does have right to information Act 2017 in place however the enactment of this law is extremely poor especially when any information is required by the CSOs or researchers for studies and/or advocacy purposes. Very recently on January 25, 2021, an amendment was moved in right to information Act 2017, by some treasury members of the Senate of Pakistan to exclude upper and lower house of the Parliament for the provision of any type of information if asked by any citizen of Pakistan. The statement of object of the amendment says " The secretariats of the Senate and the National Assembly of Pakistan are constitutional bodies. Work of the Parliament is not only extremely significant but also highly sensitive. In view of the constitutional sanctity provided to the secretariats of the Parliament, Senate and the National Assembly do not fall under the definition of public bodies, similar to the Supreme Court of Pakistan, which is not included in the definition of the public bodies in the said Act. The sanctity granted to the Parliament and its procedures in Article 69 of the Constitution of Pakistan also needs to be taken in account in the matter. Moreover decision on information related to Senate and National Assembly is strictly the prerogative of the Chairman and Speaker respectively. This amendment in the Act is proposed to ensure observance of above said sanctity and privacy of the institution to perform its Constitutional and fiduciary duty to the State and its people". Under such circumstances where upper and lower houses of the Parliament are not being considered as public bodies and prohibiting the information and data under the umbrella of laws and Constitution, this will be really difficult to get appropriate and valid data and information regarding the efforts of various stakeholders including Parliamentarians towards the achievement of SDGs especially 16.10 that demands public access to information at all levels. Since no Data Protection Law exists in the country therefore validity and efficacy of the data may also be questioned.

### **Chapter VI: Goal 16+ Progress Measurement**

## 1- System Strengthening for Progress Measurement:

There is no official mechanism set to measure the progress on most of the goal 16+ targets and indicators yet. In fact the national priority framework developed and approved by the previous government on March 2018 to strategize implementation on SDGs was questioned by the provinces declaring the framework as ambitious and non participatory. Therefore the new government decided to commence the preparation of national priority framework again with the support of provinces. The Planning Commission of Pakistan as an apex body in the country to measure the progress on SDGs invited the provinces to prepare and submit their priority frameworks and implementation strategies as early as possible. There was no deadline set for the purpose therefore the provinces has yet to complete this job. The main purpose of engaging provinces in this whole exercise was to have inputs from the grassroots for finalization of national SDGs framework and implementation strategies. Most of the SDG Units at their respective provincial headquarters have already prepared their priority frameworks and implementation strategies, however none of the framework has been approved by their provincial governments. Once the provincial governments approve their SDGs priority frameworks, the federal government will then be consolidating them and will announce national priority framework. The baseline figures for the measurement of progress on all selected goals, targets and indicators is also being revised. Five years have been passed since the adoption of SDGs by the national Parliament as national development goals however the work is still in progress at policy and structural levels.

In the meanwhile in 2019 & 2020 two provinces namely Punjab and Khyber Pakhtunkhwa respectively have revisited their planning tool called PC-1 (project cycle-1, mandatory for planning and execution of any developmental project in the government system) to align results and outcomes of developmental projects / interventions with that of SDGs targets and indicators. The other provinces and regions of Pakistan are also following this best practice. This best practice of integrating the project results with SDGs has not only strengthened the system but also institutionalized the SDGs agenda at national, provincial and local levels. This will help measure the progress of each and

every project for how it is contributing to achieve SDG targets and indicators. This best practice may be recommended to other countries also.

#### 2- SDGs Citizens' Scorecard and Citizens' Dashboard:

The SDGs Citizens' Scorecard is a beneficiary centric tool to track and measure the progress and challenges in achieving SDGs. Government and CSOs in Pakistan are already well aware regarding the importance of Citizens' Scorecard and its impacts on policy reforms, strategy formulation, identifying priorities & missing links as well as opportunities, tracking progress & operational gaps, performance measurements, creating healthy competitions etc. The Citizens' Scorecard also encourages good governance and better management as well as accountability

policies, processes and practices through citizen led data, qualitative stories of success and failures. Pakistan Poverty Scorecard being used for the identification of beneficiaries under **Benazir Income Support Program** (BISP) and Ehsaas **Emergency Cash Grants**. However, no Scorecard for other socio-economic and political perceptions of masses has ever been introduced. AwazCDS-**Pakistan and Pakistan Development Alliance** and its partners across country has launched the

first ever Citizens' Scorecard on SDGs. Initially we have selected five goals i.e. health (SDG3), education (SDG4), gender equality (SDG5), reduce inequality (SDG10) and peace Justice & strong institutions (SDG16). All together 18 targets are selected considering aforementioned 5 goals. Most of the targets are selected considering the government's priority targets and indicators as mentioned in their national and provincial priority frameworks. A survey tool comprised of 128 questions, was developed by a group of national experts comprised of representatives from National Human Rights Institutions, Parliamentary Task Forces, SDGs Units as well as INGOs and CSOs. The scope of the Scorecard was defined around different dimensions of related targets and indicators considering the factors regarding accessibility, affordability, quantity and quality of services. Further details are available at first ever SDGs Citizens' Dashboard

Only 13 targets of goal 16+ were covered under citizen scorecard including 4.5, 4.a (quality education), 5.2, 5.3, 5.5 (gender equality), 10.2, 10.4 (economic inequality), 16.1,16.3,16.4, 16.5, 16.6, 16.7,16.9 and 16.10 (peaceful, just and inclusive societies). The response of citizens' are reflected by following the traffic light approach as mentioned below.

The highest score (48.93%) was on provision of legal identity for all, including birth registration(16.9) and the lowest score (15.44) was on responsive, inclusive, participatory and representative decision making (16.7). Furthermore the reduction in corruption (16.5 & 6) scores (-71.34) extremely negative. The result of the scorecard also syncs with the corruption index of transparency international that has ranked Pakistan at 124 out of 180 countries in the most recent Corruption Perception Index 2020. Target 10.2, to empower & promote social, economic and political inclusion of all secured highly negative score (-69.93). This shows the high rate of polarization of our society on the basis of religion, ethnicity, gender, income, age, disability and origin.

## **Chapter VII: Role of Parliamentarians & CSOs**

## 1: Engagement & Role of Parliamentarians in National SDGs Mechanisms & Review Processes:

After the adoption of 2030 Agenda for social transformation by UNGA in September 2015, the national Parliament of Pakistan was the first amongst the world to adopt the SDGs as National Development Goals (NDGs) in March 2016. SDGs Secretariat<sup>25</sup> was established at the Parliament House and National Parliamentary Task Force on SDGs was also formed for the oversight on the implementation of SDGs in 2017. The national task force is comprised of 50 (30 female and 20 male) Parliamentarians representing all provinces and regions as well as all parties. Afterwards provincial and regional Parliamentary Task Forces on SDGs were also notified in the four provinces including Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh and regions including Azad Jammu & Kashmir and Gilgit Baltistan. Three SDGs task force committees/ sub groups are also functional on quality education (goal 4), gender equality (goal 5), decent work & economic growth (goal 8) and child rights (goal 16), however there is no special committee/ sub group on any of the goal 16+ targets and indicators related to goal 1, 10, 11,16 and 17. SDGs Secretariat was instrumental in bringing 10 bill, 22 resolutions. 37 call attention notices, 7 motions and 7 questions during the house in business since its inception in 2016 including the transgender persons (protection & rights) Act 2017.

<sup>&</sup>lt;sup>25</sup> http://sdasecretariat.com/

the prevention and control of human trafficking (amendment act) 2017, and national commission on status of women amendment Act 2016. A resolution on freedom of expression and rights of journalist was also passed on December 10, 2018.

One of the major achievement of SDGs Secretariat at Parliament House is the SDGs Legislative Mapping considering all the 17 goals that also includes 20 new or amendment laws at national, provincial and regional levels related to the goal 16+

targets. All together 41 new laws/ acts and amendments were introduced. Most of the legislation is done regarding goal 1, 2,3, 4, 5, 8, 10, 15 and 16, however the progress on implementation of these laws is missing. Contextualization of SDGs at local level and synchronization with existing policies, plan and legislation is a big gap that need to be addressed in order to have a context specific holistic plan to deal and address national, subnational issues as well as international pledges made by government of Pakistan for sustainable development backed with clear plan of action with short, medium and long term costed strategies. Strangely the table is silent about the legislation passed in Punjab, Balochistan, Islamabad Capital Territory (ICT) and Sindh around article 25A, of the constitution on free and compulsory education for all up to the age of 16. This is important to mention here that right to

education (article 25A) is not implemented yet any province in true letter and spirit. Mapping of existing laws and policies have already been carried out and the mapping shows that comprehensive polices and frameworks are available in the country to comply with the goal 16+targets and indicators however the challenge is lack of political will and pro-people governance structures.

## 2: Role of CSOs in Implementation, Progress, Monitoring and Review of Goal 16+

Civil society in Pakistan is very active in sensitization of masses and holding governments accountable towards the achievement of SDGs in Pakistan. Unlike MDGs, the response of CSOs including political & legal fraternity, academics, NGOs, community based organizations and private sector organizations on SDGs is extremely

benefiting and integrated in their socio-economic, educational and political interventions. Despite the coercive regulatory environment towards the civic spaces, freedom of speech & expressions, right to information etc. the CSOs are being engaged by the governments for policy level interventions and encouraged to sensitize masses on SDGs. Pakistan has already presented its first Voluntary National Review Report at UNHLPF 2019. CSOs in Pakistan played their role while engaging citizens and collecting their voices on the process and progress of SDGs in Pakistan. Although the official VNR 2019 does not reflect on goal 16+ targets however the citizens' voices report on review & progress in implementation of SDGs in Pakistan<sup>26</sup> published by Pakistan Development Alliance<sup>27</sup> Moreover, SDGs Citizens' Watch Pakistan Program launched the first ever SDGs Citizens Scorecard and reflected the results through SDGs Citizens' Dashboard<sup>28</sup>. Many other organizations have taken up the SDGs agenda including goal 16+ targets while integrating the services related targets in their developmental interventions, however very few voices are there to hold the governments accountable. Citizens Scorecards are the best way to collect citizens voices and to influence the policy makers for better reforms and developments. No separate forum is yet available on goal 16+ in Pakistan.

## **Chapter VIII: Concrete Recommendations:**

#### National / Government of Pakistan:

- National Commission for Human Rights is non-functional since June, 2018. Government of Pakistan should immediately appoint new commissioners and chairperson of the Commission. Furthermore the government should adopt all legislative, policy and institutional measures necessary to ensure that the NCHR is able to carry out its mandate fully and in an effective and independent manner, and in full conformity with the principles relating to the status of national institutions for the promotion and protection of human rights as per the Paris Principles.
- National Commission on the Status of Women in Pakistan is also non-functional since 2018 as the chairperson of the commission has yet to be appointed. The government is urged to appoint the chairperson as early as possible. The government should also strengthen its efforts to provide the Commission with sufficient financial and human resources to carry out activities throughout the country.

<sup>&</sup>lt;sup>26</sup> http://pda.net.pk/wp-content/uploads/2016/01/Citizens-Voices-Report-2019.pdf

<sup>&</sup>lt;sup>27</sup> Pakistan Development Alliance is the largest coalition of NGOs and CSOs in the country, working together for better governance & accountability towards the achievement of SDGs. PDA has 114 member organizations from all across the country representing youth, PLWDs, women, transgender community, elderly people and religious minorities etc.

28 http://pda.net.pk/wp-content/uploads/2016/01/SDGs-Citizens-Watch-Pakistan-Program-Dossier.pdf

- According to the Law & Justice Commission of Pakistan there are more than 120 laws which are discriminatory in nature. Therefore the government should take all necessary measures, including the adoption of comprehensive anti-discrimination legislation, to ensure that its legal framework provides full and effective protection against discrimination in all spheres, including the private sphere, and prohibits direct, indirect and multiple discrimination on the basis of religion, political opinion, ethnicity, disability, sexual orientation and gender identity or any other reason that does not provide rightful space and choices of life to the citizens of Pakistan.
- Government should expedite the legislation relating to violence against women at the federal and provincial levels particularly on early, child and force marriage restraints, and curbing domestic violence. The government should ensure that the laws comply with international human rights standards. Furthermore, the government should effectively enforce the anti-honour killings and anti-rape laws and other relevant laws criminalizing violence against women and domestic violence, and monitor their enforcement on regular basis.
- Government should public the Commission of Inquiry Report on enforced disappearances and initiate legislation for the criminalization of enforced disappearance and put an end to the practice of enforced disappearance and secret detention.
- Government should review the coercive policies and regulatory frameworks towards NGOs and create rightful spaces for them to ensure freedom of expression and association
- Government should immediately announce local government elections and form local governments all across the country as per the directions of the supreme court of Pakistan. Goal 16+ targets may not be achievable without functional and financially empowered local governments

## **Regional Institutions:**

- Regional Forums on goal 16+ need to be created for more collaborative actions to influence governments towards peaceful, inclusive and just societies
- Multi-stakeholders engagement processes need to initiated under the umbrella of UN for regional peace, trade & development, enhanced civic spaces and freedom of expression and association
- Regularize the annual sessions of South Asian Association for Regional Cooperation (SAARC) to combat poverty, inequality, climate changes, terrorism and violent extremism

#### **Global Institutions:**

 Global funding agencies and bilateral donors should invest on local civil society organizations for more sustainable, inclusive and participatory solutions for addressing chronic issues related to freedom of expression and association, civic spaces and liberalization of conservative societies

- G20 should provide financing for SDGs especially goal 16+ to ensure more peaceful, inclusive and just societies
- Official Development Assistance (ODA) for developing nations should be linked with progress on goal 16+ targets.

## **Annexure 1: Pakistan Priority Framework & Baseline Data Details**

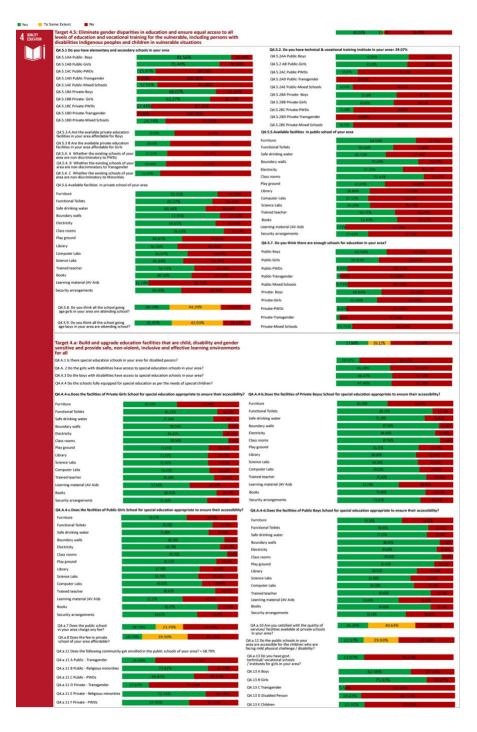

## Annexure 2: Results of Local Indicators (questions) for Citizens' Scorecard on Selected Targets of Goal 16+

o Some Extent

#### Target 5.2: eliminate all forms of violence against all women and girls in public and private spheres, including trafficking and sexual and other types of exploitation

Q5.2.1 A Do you think women in your area face any form of violence at Public Sphere?

Q5.2.1 B Do you think women in your area face any form of violence at Private sphere?

Q5.2.2 Do you think women in your area get inheritance?

Q5.2.3. Do you think women in your area caste vote by their own choice?

Q5.2.4. Do you think women in your area have equal employment opportunities?

Q5.2.5. Do you or people in your area trust on police to report cases on violence against women / girls?

Q5.2.6. Do Women have access to police/law enforcement agencies in case of following?

O5.2.6 A Physical violence

Q5.2.6 B Sexual violence

Q5.2.6 C Psychological violence

Q5.2.7 A Physical violence

Q5.2.7 B Sexual violence

Q5.2.7 C Psychological violence

Q5.2.8. Do woman have access to medical & legal assistance in case of physical violence?

Q5.2.9. Do woman have access to medical & legal assistance in case of sexual violence?

Q5.2.10. Do woman have access to medical & legal assistance in case of psychological violence?

Q5.2.11. Is there any cost incurs for filing and pursing a complaint in police station regarding any instance of violence against woman/girl?

Q5.2.12. Are you satisfied with the quality of services/ response provided by police/law enforcement agencies in cases related to physical, sexual or psychological violence against women, in your area?

Q5.2.13. Do the law enforcement agencies have appropriate knowledge / capacity to deal with the cases of physical, sexual and psychological violence?

Q5.2.14. Are there women police officers available in police station of your area?

#### Target 5.5: Ensure womens full and effective participation and equal pportunities for leadership at all levels of decision-making in political, economic and public life

Q5.5.1. In your area does women have full and effective participation in

Q5.5.1 A Political activities (Do women vote by their choice?)

Q5.5.1 B Economic opportunities (Do women have equal opportunities for government Jobs)

Q5.5.1 C Social life (Do the women have mobility rights as per their choice )

#### Target 10.2: By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or

Q10.2.1. Do you think that families belong to very poor category has sustained income growth? Q10.2.2 A Are there economic opportunities are For all in your area Q10.2.2 B Are there economic opportunities are Especially for poor class in your area Q10.2.3.A Do you think if there is any discrimination in social decision making by Age Q10.2.3.B Do you think if there is any discrimination in social decision making by Sex Q10.2.3.C Do you think if there is any discrimination in social decision making by Race Q10.2.3.D Do you think if there is any discrimination in social decision making by Ethnicity Q10.2.3.E Do you think if there is any discrimination in social decision making by Origin Q10.2.3.F Do you think if there is any discrimination in social decision making by Disability Q10.2.3.G Do you think if there is any discrimination in social decision making by Religion Q10.2.3.H Do you think if there is any discrimination in social decision making by Poor Q10.2.4.A. Do you think if there is any discrimination in economic decision making by Age Q10.2.4.B Do you think if there is any discrimination in economic decision making by Sex Q10.2.4C Do you think if there is any discrimination in economic decision making by Race Q10.2.4.D Do you think if there is any discrimination in economic decision making by Ethnicity Q10.2.4.E Do you think if there is any discrimination in economic decision making by Origin Q10.2.4.F Do you think if there is any discrimination in economic decision making by Disability Q10.2.4.G Do you think if there is any discrimination in economic decision making by Religion Q10.2.4.H Do you think if there is any discrimination in economic decision making by Poor Q10.2.5.A Do you think if there is any discrimination in political decision making by Age Q10.2.5.B Do you think if there is any discrimination in political decision making by Sex Q10.2..5C Do you think if there is any discrimination in political decision making by Race Q10.2.5.D Do you think if there is any discrimination in political decision making by Ethnicity Q10.2.5.E Do you think if there is any discrimination in political decision making by Origin Q10.2.5.F Do you think if there is any discrimination in political decision making by Disability Q10.2.5.G Do you think if there is any discrimination in political decision making by Religion Q10.2.5.H Do you think if there is any discrimination in political decision making by Poor

#### Target 10.4: Adopt policies, especially fiscal, wage and social protection policies, and progressively achieve greater equality

Q10.4. 1. Do you think that people know the minimum wage in the country/province?

Q10.4.2. Do you or people in your community receive minimum wage?

Q10.4.3. Do the people in your community know authority/mechanism to report in case of non-compliance of minimum wage rate?

Q10.4.4 Do you have access to relevant authorities to report non-compliance of minimum wage rate?

Q10.4.5. Do you have access to social protection facilities i.e. EOBI/ social security services and Health and life

Q10.4.6. Do you know that people of your community are aware about Labour laws in the country to protect the rights of laborers?

Q10.4.7. Do you think your community is satisfied with the response of govt. authorities in cases of violation of labor laws?

Q10.4.8. Do people of your community have ever faced the situation where their daily/ monthly wages were violated?

Q10.4.9. Do you know if male and female workers in your community get equal wages in your area/ work place?

Q10.4.10. Do the people in your community think quota for women in public offices/departments is being adhered?

O10.4.11. Do the people in your community think quota for PWDs in public offices/departments is being adhered?

Q10.4.12. Do the people in your community think quota for minorities in public offices/departments is being adhered?
